

My current role is the Operations Administrative Assistant for Children's Miracle Network (CMN). I have been in this role since November 2014. This job is a dream job for me as I have utilized the services of CMN in the past. I previously worked for Penn State Health in Environmental Health and Neurosurgery. My background is in Project Management and finance, but I've had various roles in sales, scheduling, and new hire onboarding as well.

I am born and raised in Central Pennsylvania. I like to say that I've always been within an hour of the chocolate capital of the world. My second home is down south at the beach. I enjoy spending time with my three children, Christopher, Nathan and Charlotte. We all love rollercoasters, the beach, and animals. I am involved with horses, cooking, and gaming outside of work.
